LONDON

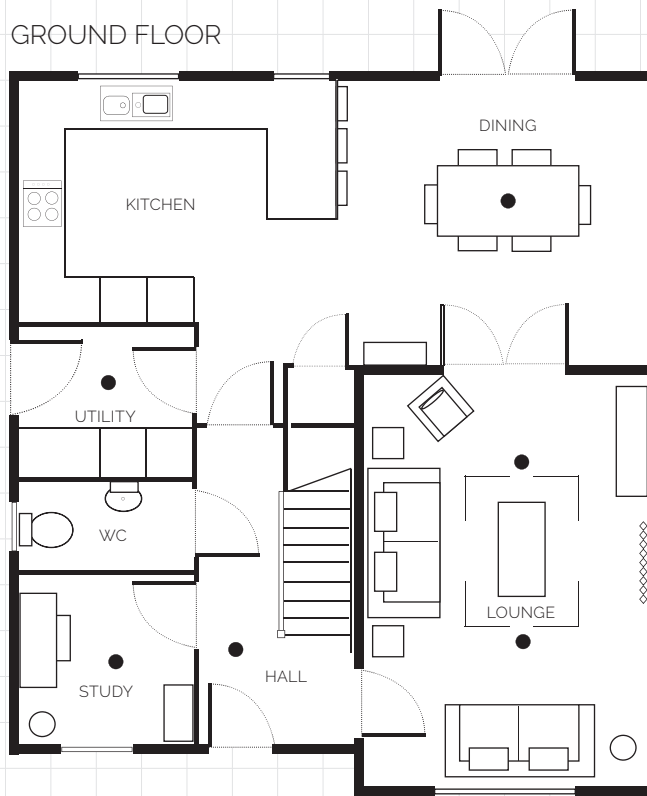

In September we visited the London Design Festival. We loved Farrow & Ball's immersive installation at Shoreditch's Village Underground. They unveiled nine new colours in a unique and extraordinary experience. We were inspired by their botanical design and autumnal colours.

take one display cabinet...

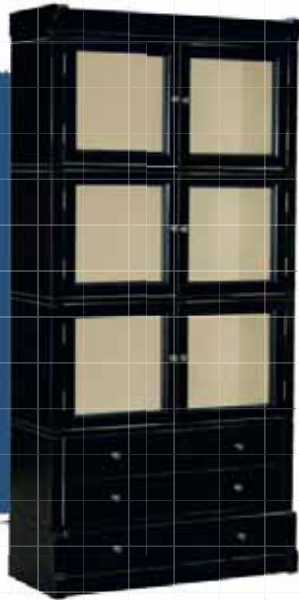

create the look...

To create this beautiful bespoke cabinet we first painted it in a rich Venetian blue. To add the "wow" factor we papered the inside back panel with a quirky 'designer' wallpaper. To complete the look the cabinet was filled with objet d'art and voila...

"TALKING POINT"

We like making a statement - it can be as simple as a bold feature paint colour or a fantastic patterned upholstery. Rich colour and pattern are one of the strongest trends in 2019. Both fashion and interiors have embraced this trend - be bold and let the opulence envelop you.
